D-Care™ Protective Coveralls M22-MIC40

Description

• **Protective Coveralls M22-MIC40** is disposable coveralls made of **Microporous Laminated Film**, intended to prevent the surface contact of all or part of the body from potentially infectious blood, fluids, or secretions and agent-carrying droplets which contain infectious diseases when in closed contact with patients or capable people of carrying pathogens in epidemic prevention.

Key Features

- Made of good quality material, provides good air permeability, liquid protection, and strong protection.
- Elasticated hood, cuffs, ankles, and waist for convenience and freedom of movements.
- Strong zipper for additional protection.
- Fabric materials and sewing structure ensure AATCC 42 \leq 1.0g, AATCC 127 \geq 50cm and pass ASTM F1671
- Protective Coveralls can be also combined with other accessories items such as Medical Face Masks, Gloves, Goggles, and Face Shields to create a protective clothing set.
